

# AvaSure Analytics™

Measure program performance, patient outcomes, and adoption with powerful analytics and reporting on your AvaSure program.

## Design the Perfect Virtual Care Implementation

Work closely with a dedicated customer success team to ensure you are tracking the right success metrics, benchmarking against relevant hospitals, and configuring your dashboards in a way that drives success company-wide.

### Actionable Intelligence

- Gain insights into patient risk factors, utilization, alarm rates, staff interventions, and events prevented
- Equip leadership with straightforward graphs and program successes
- Identify targeted areas of improvement by care unit and staff member

### From the Macro to the Micro

- Drill into individual care unit data for a granular understanding of performance
- Analyze individual virtual safety attendants to enhance program efficiency and training
- Investigate adverse events to identify areas for improvement and mitigate risks effectively

### Comparative Advantage

- View benchmarks by the national average and organization type (Academic Medical Center, Magnet, VA, Rehab, Critical Access, etc.)
- Compare results on utilization, alarm rates, staff interventions, and bedside staff responsiveness
