

AvaSure TeleSitter[®]

The intelligent virtual care platform

Over 1,100 hospitals use AvaSure to engage with patients, optimize staffing, and seamlessly blend remote and in-person treatment at scale. Drive measurable outcomes and empower clinicians with AI-powered continuous monitoring that elevates your virtual sitting strategy.

Continuous monitoring for virtual sitting at scale

Adopt a powerful, AI-augmented application for patient monitoring and observation that lets you replace 1:1 sitters and prevents adverse events across your healthcare system.

High-fidelity, 360° cameras make it easy to observe patients over video.

Reduce the need for 1:1 sitters

A single staff member can safely monitor many patients at once with AvaSure. Cutting-edge computer vision helps prevent adverse events, ensuring virtual staff act fast when they are needed.

AI-powered fall and elopement detection augments virtual staff.

Observer alertness monitoring increases response times and elevates care quality.

“The cost-effectiveness of our virtual sitter technology compared to traditional methods has been incredibly impactful. Some units in our hospital saw a 73% reduction in 1:1 sitters.”

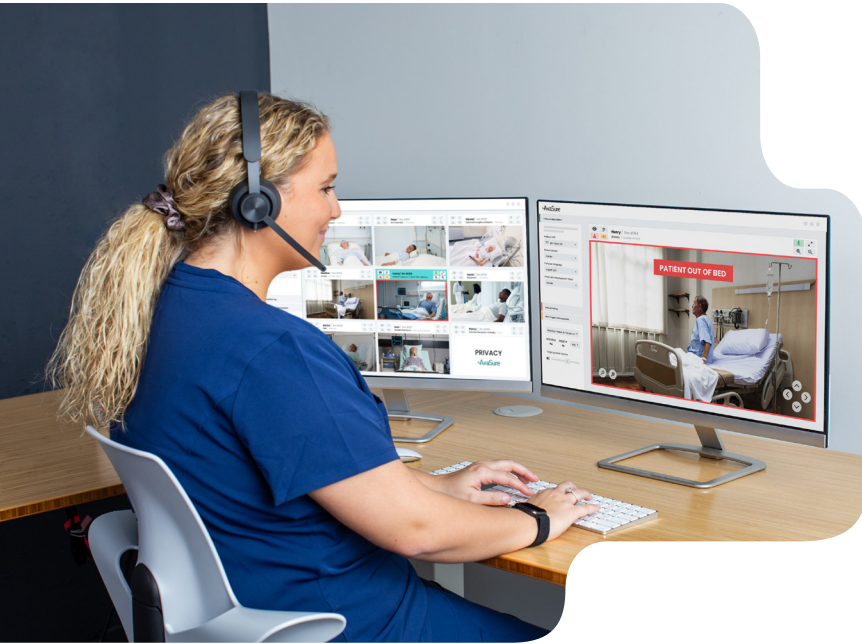

Pre-recorded prompts in 30+ languages.

— Cole Rogers, BSN, RN, Nurse Manager at St. Luke's Hospital

Performant, scalable infrastructure makes the platform reliable at all times.

Respond quickly to patients in need

Reduce response times by helping remote clinicians react quickly to patient safety events, such as falls, elopement, suicide risk, cognitive disruption, workplace violence and more. AvaSure customers respond to Stat alarms within 17 seconds on average.

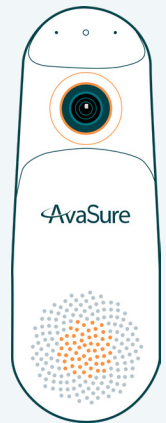

Medical-grade, reliable devices

Equip every room with one of AvaSure's configurable devices. Video feeds from AvaSure's high-fidelity cameras can be made accessible to partners or third-party applications via API.
